# Nourhan AbdElNafea

AI Engineer

ABOUT ME

I am a student eager to develop my skills in artificial intelligence (AI), can work on multiple projects at the same time with high efficiency and without mistakes. My current focus is on learning various AI techniques and tools to understand how they can be applied to solve realworld problems. I aim to gain hands-on experience in AI through projects and research, ultimately working towards a career where I can contribute to innovative AI solutions.

EDUCATION

2022-2026,Bachelor's

Degree in **Computer Science**

Assiut University (ongoing).

WORK EXPERIRNCE

Certifications and Courses

01.   Training at NTI

Focus:Machine Learning (ML)
Description :Completed a Specialized training program in Machine Learning at NTI,Where I developed a solid understanding of ML concepts and applied them in practical scenarios.

SKILLS

01. **Programming Languages:**

Python,C++,Java,C,C#

02. **Database Management:**

MySQL

03. **Frameworks:**

Scikit-learn,
Machine Learning
Libraries.

04. **Tools:**

Pandas, NumPy, Matplotlib
, Google Colab.

My PROJECT:

Default credit card preprocessing and model:
Python,Pandas, matplotlib, Sklearn (Aug 2024)
• Preprocessed credit card default dataset and applied machine learning models (Logistic Regression). Focused on data cleaning, feature scaling, and model performance evaluation to predict default risks.
